

§pecs

From specification to certified test, in one session.

400 pages. Every year. By hand.

A new specification lands every December. **~400 pages.** Someone reads every line, and writes every test case.

WHERE THE HOURS GO

Four steps, all by hand

📖

Read the spec

~400 pages

→

✍️

Extract rules

by hand, § by §

→

☑️

Write test cases

3,000–4,000 cases

→

⌨️

Dev types them in

manually, per vendor

Every year. By hand. Zero error tolerance.

OUR SOLUTION

§pecs

From specification to certified test, in one session.

AI reads the spec

You approve

Every value traces to a §

Before

Weeks of reading. Thousands of test cases, written and typed in by hand.

After

Spec in, certified tests out: in one session, every value traced to the spec.

Thank you!
